Jakarta Utara, DKI JAKARTA

Fresh graduate with more than 3 years of experience in creating websites, focusing on Website Development. Skilled in developing user-friendly, responsive websites and building scalable program structures, as well as having strong problem-solving abilities and a passion for innovation. Being able to work in a team and collaborate well, I have won two IT competitions that strengthen my technical skills. I am eager to contribute to a company that drives innovation and helps create high-quality user experiences through cutting-edge web and software solutions.

Education Level

Universitas Gunadarma - Indonesia Sep 2020 - Aug 2024

Bachelor of Computer Science, 3.77/4.00

- 2nd place USB (Unlimited Software Builder) Competition
- 2nd place Technology Innovation Competition

SMAN 89 JAKARTA - Indonesia Aug 2017 - Jul 2020

Majoring in social sciences

Work Experiences

PT. TEMAS Tbk. - Jakarta, Indonesia Aug 2023 - Dec 2023

IT Developer Internship

- Implementing the look and layout of the company's website with a focus on functionality. Uses responsive frameworks to ensure an optimal user experience across devices. Every design element is taken care of to create an attractive and intuitive interface.
- Build dynamic interactions that support business goals and increase user engagement. Additionally, it integrates essential features, such as registration forms, search systems, and data processing, to ensure the website functions properly and meets the needs of users.
- Build an organized and modular program structure to facilitate code management and further development. Adopt best practices in software development, including the use of a version control (Git) system, so that all code changes can be tracked properly and collaboration between teams becomes more efficient
- Identify and fix bugs contained in website code and proper testing. Conduct an in-depth analysis of the emerging problem to find the root cause, as well as ensure that the solution implemented does not interfere with other functions of the website

Activities

Gemastik Competition - West Java Jun 2023

Front-End Developer

- Implementing website layouts. Focus on creating user-friendly and compatible displays across devices and browsers.
- Identify, analyze, and fix bugs website's code using debugging tools like Chrome DevTools. Conduct regression testing and unit testing to ensure the stability and optimal performance of the website after repairs.
- Develop website features and functionality. Build dynamic interactions on web pages to improve user experience (UX) and website performance.
- Build a modular and efficient program structure using good software design principles, such as solid, to ensure scalability and ease of application maintenance. Organize workflows using a version control (Git) system and work in a collaborative development environment.

Mathematics Website Application for Scientific Writing. - West Java May 2023 - Aug 2023

Website Application Developer

- As a maker and pioneer of the formation of a Mathematics website application that contains problem solving and information about non-linear equation systems.
- Design and implement mathematical solutions for complex systems of non-linear. equations. Using numerical methods such as Newton-Raphson, or optimization algorithms to solve equations efficiently. Create solutions to ensure high accuracy and optimal computing time, integrated in applications or systems for better data processing.
- Overcome errors by fixing bugs by finding the root cause of the problem and overcoming the problem and then testing until there is no consensus on the results.
- Build an organized web application structure and design an intuitive, user-friendly UI/UX and responsive and accessible website on all devices.
- Identify and fix bugs contained in website code and proper testing. Conduct an in-depth analysis of the emerging problem to find the

root cause, as well as ensure that the solution implemented does not interfere with other functions of the website.

Technology Innovation Competition at The City Level - North Jakarta

May 2023 - Jun 2023

Front-End Developer

- Build an organized web application structure and design an intuitive, user-friendly UI/UX and responsive and accessible website on all devices.
- Optimize the functionality of the website to fit the purpose and run smoothly.
- Identify and fix bugs contained in website code and proper testing. Conduct an in-depth analysis of the emerging problem to find the root cause, as well as ensure that the solution implemented does not interfere with other functions of the website.

USB (Unlimited Software Builder) Competition - West Java

Jul 2022 - Nov 2022

Front-End Developer

- Build an organized web application structure and design an intuitive, user-friendly UI/UX and responsive and accessible website on all devices.
- Optimize the functionality of the website to fit the purpose and run smoothly.
- Identify and fix bugs contained in website code and proper testing. Conduct an in-depth analysis of the emerging problem to find the root cause, as well as ensure that the solution implemented does not interfere with other functions of the website.

Skills, Achievements & Other Experience

- **Achievements** (2023): 2nd Place Technology Innovation
- **Achievements** (2022): 2nd Place USB (Unlimited Software Builder)
- **Hard Skills:** HTML, CSS, JavaScript, PHP, React, Laravel, Express, NodeJs, JQuery, Bootstrap, Tailwind CSS, MySQL, MongoDB, PostgreSQL, Git, Microsoft Office Suite
- **Soft Skills:** Communication, Problem Solving, Critical Thinking, Work Under Pressure, Teamwork, Creativity, Hard Worker, Discipline
- **Interest:** Web Developer, Front-End Developer, Software Engineer, IT Developer and Information Technology
