Universitas Gunadarma - Indonesia <i>Bachelor of Computer Science, 3.77/4.00</i> 2nd place USB (Unlimited Software Builder) Competition 2nd place Technology Innovation Competition	Sep 2020 - Aug 2024
SMAN 89 JAKARTA - Indonesia <i>Majoring in social sciences</i>	Aug 2017 - Jul 2020

Work Experiences

PT. Mitra Lestari Motorindo (Mitra 2000) - Jakarta, Indonesia <i>Full Stack Developer</i> - Developed and maintained enterprise-level web applications across 6 production systems with a focus on scalability, performance, and clean architecture. - Designed and built a WhatsApp Broadcast Management System end-to-end as the sole developer, including audience segmentation, scheduled broadcasting, media support, and analytics dashboard. - Implemented product search engine with synonym expansion, relevance scoring, and attribute-based filtering, improving search accuracy across the e-commerce platform. - Developed a real-time POS Customer Display system with payment integration, deployed across the physical store network. - Built multiple customer-facing features including personalized garage, booking service wizard, interactive 3D product microsite, and daily reporting dashboard with marketplace reconciliation. - Integrated third-party services for messaging and broadcasting across storefront, POS, and broadcast systems. - Built a Ticketing and Customer Complaint system with attachment handling, photo evidence upload on status transitions, and print functionality. - Implemented multi-language internationalization (i18n) support across storefront and reporting systems, covering Indonesian, English, and Thai. - Implemented responsive landing pages based on UI/UX designs, aligning with business goals and marketing objectives. - Designed and implemented SEO strategy from scratch for the e-commerce platform, including on-page optimization, structured data, and performance improvements to enhance search visibility. - Performed debugging, testing, and system optimization to ensure application stability and minimize production issues.	Dec 2024 - Present
PT. Sinergi Merah Putih - Jakarta, Indonesia <i>Frontend Developer</i> - Implemented UI/UX designs into responsive and interactive web interfaces across multiple devices. - Developed reusable and scalable frontend components to improve development efficiency and maintain consistency. - Ensured alignment between business requirements and delivered features through structured development processes. - Performed debugging and troubleshooting to maintain application stability and performance. - Optimized frontend performance and page load speed to enhance overall user experience. - Collaborated with cross-functional teams to deliver features aligned with project goals and timelines.	Nov 2024 - Feb 2025
PT. TEMAS Tbk. - Jakarta, Indonesia <i>IT Developer Internship</i> - Developed responsive web interfaces to ensure optimal user experience across devices. - Implemented core features such as forms, search functionality, and data processing systems. - Structured modular and maintainable code to support scalability and future development. - Utilized Git for version control and team collaboration. - Identified and resolved bugs through systematic debugging and testing.	Aug 2023 - Dec 2023

Activities

- Implemented responsive and user-friendly web interfaces across devices and browsers.
- Developed interactive features to improve user experience and application performance.
- Performed debugging and testing (including regression testing) to ensure system stability.

- Developed a web-based application for solving non-linear equation systems using numerical methods (e.g., Newton-Raphson).
- Designed and implemented responsive UI/UX and structured application architecture for scalability.
- Conducted debugging and testing to ensure accuracy, performance, and system reliability.

- Built responsive and user-friendly web interfaces aligned with project objectives.
- Optimized website functionality and performance.
- Performed debugging and testing to ensure application stability.

- Developed responsive and accessible web interfaces across multiple devices.
- Enhanced website functionality and performance through feature implementation.
- Conducted debugging and testing to ensure system reliability.
